

Ancon Gear & Instrument Corp Announces AS9100 Certification

Ancon Gear & Instrument Corp demonstrates continued commitment to high quality standards and processes for aerospace products

Amityville, NY, April 13, 2015 Ancon Gear & Instrument Corp, a leading manufacturer in precision machined components & gears, has been certified to the ISO 9001:2008 and AS9100C quality management standard at this facility. The certification to the international aerospace quality standard signifies management's ongoing commitment, by meeting and exceeding increasingly stringent industry requirements for aerospace related products, in both commercial and military markets.

AS9100 is the international quality management standard for the Aircraft, Space and Defense (AS&D) industry, AS9100 Rev. C being the most current standard. This standard provides manufacturing suppliers with a comprehensive quality system which produces safe and reliable products. AS9100 is managed by the International Aerospace Quality Group (IAQG) and based upon ISO 9001. Ancon has achieved this certification to strengthen their competitive position by standardizing quality processes across the organization.

"Adding AS9100 certification is a testament to Ancon's commitment, by supporting the people who make our world a safer place," comments Joe Markiewicz, President. "Ancon has always been diligent about its QMS. This certification reflects our continuous efforts to ensure that our process-oriented approach will meet and exceed our customer's requirements."
